If it will be any encouragement for the first term of school to have a good class and sid in the going forward of the good work begun, I can say that there can be three students obtained from this place—all senior students. If there be any likelihood, in your opinion, of the school going on, please inform me as soon as pasible so that we can make our arrangements to suit; further, please send us a catalogue in case the scheme goes forward. I believe that there might be five students gotten from this township.

It would not take many more township ke this to roll up a roster that would take the school an assured success. WHAT DR. HEEVES THINKS.

Dr. Reeves in talking over the matte with an INTELLIGENCER reporter last even-ing after jokingly taking him to task for the paper's use of his name without his knowledge, as Dean of the proposed col-lege said: "The acheme is a perfectly knowledge, as Dean of the proposed college said: "The scheme is a perfectly practicable one, viewed from every standpoint. There is no doubt that a very sucsuccessful Medical College could be established here, if our authorities and the citizens give the proper encouragement. There are two points in connection with the scheme that have not been published yet. One is this: when the Capitol was removed to Charleston our County Commissioners appropriated \$5,000, as you will remember, for the county library. Now that is a large sum of money, and with it much could be done for a medical college. Why should not the authorities encourage such an institution of learning as well and as liberally as it contributes to the facilities for practice in the courts?

"Another point: the high legalized status of the medical profession in this State is the envy of physicians in almost every other State in the Union. Our excellent medical registration is notsurpassed in any State. I predict that in addition.

ellent medical registration is not surpassed in any State. I predict that in addition to the students we would secure in this State they would come from Western Maryland, Western Pennsylvania and Eastern Ohio, knowing that they would be put through such a course at our State Medical School that registration under our State Board of Health would follow at once, thereby enabling them not only to practice in their own States, but in West Virginia, in fact anywhere. in any State. I predict that in addition

WHERLING'S ADVANTAGES. "Another thing: this is the only place in the State where the students could have an opportunity to study full microscopic technique. There are many other reasons that present themselves, favoring the location of the department here. It could have the benefit here of many advantages it would not have in any other place it.

The first question raised by nearly every one in considering the feasibility of the scheme is, can a sufficient number of students be secured? In this connection the following letter received by Dr. L. P. Pasyas vestarday is significant:

A mass meeting of Masonic brethren was held last evening in the Masonic hall. R. J. Smyth presided and C. H. Collier acted as Secretary. The object of the meeting was to consider the proposition to erect a Masonic Temple.

After due consideration, it was resolved that it was the sense of the meeting that the action of the Trustees of the several masonic bodies in organizing and incorporating the Masonic Temple Association, met with the approval of the fraternity, and the incorporators were urged to complete the organization at once.

A committee of five was appointed to solicit subscriptions. Many of those present subscribed to the capital stock, and many others will do so as soon as the organization is perfected.

The committee renorded that it had se.

A Caved in Tunnel.

The Baltimore & Ohio's Pittsburgh-Cin-. The Baltimore & Ohio's Pittsburgh-Cincinnati express, due here from Pittsburgh over the Hempfield branch at 10:25 o'clock last night, did not get here until nearly midnight. The cause of the delay was the caving in of the first tunnel its being widened for a double track and its being arched. Early yesterday morning there were indications of a cave-in, but the morning trains got through all right. Later in the day a violent rain storm took place and early last evening the caving occurred. A train was sent out from here for the passengers on the train from Pittsburgh, who had to wade in mud over the hill, a distance of about half a mile. All the baggage and mail had to be transferred. The passengers had a very disagreeable time, especially the ladies.
